d120.de/questions

HRZ & ISP

- **Hochschulrechenzentrum**
 - HRZ for short
 - University-wide services (Wi-Fi, VPN, ...)
- **Infrastruktur und studentischer Poolservice**
 - ISP for short
 - Formerly known as Rechnerbetriebsgruppe (RBG)
 - Department-specific services (Pools, SSH, ...)

Accounts

- Two Accounts for every computer science student
 - HRZ and ISP
- Same username
 - TU-ID (Schema xy42j uhu)
- But different passwords
- For a more-or-less complete guide, visit d120.de/acc-en

2FA

- HRZ account requires 2-factor authentication starting from the 1st of January
- Also see d120.de/acc-en

Email

- Two Email addresses per student
- HRZ Email:
 - vorname.nachname@stud.tu-darmstadt.de
- ISP Email: (still uses RBG Domain)
 - TU-ID@rbg.informatik.tu-darmstadt.de
- Retrieval: see guide at d120.de/acc-en

TUDa app

- Used for digital student ID
 - Available in paper instead (!) of in the app
- Additional features
 - Mensa (there's also another app for that)
 - ULB (library)

Wi-Fi

- **eduroam**
- WPA2-Enterprise Authentication
- Separate Wi-Fi login credentials
- Works internationally at cooperating institutions

www.hrz.tu-darmstadt.de/eduroam

Standards

754-2019 - IEEE Standard for Floating-Point Arithmetic

Publisher: IEEE

Revision of IEEE Std 754-2008

Status: Active - Approved

46 Paper Citations

7825 Full Text Views

Abstract

Abstract:

This standard specifies interchange and arithmetic formats and methods for binary and decimal floating-point arithmetic in computer programming environments. This standard specifies exception conditions and their default handling. An implementation of a floating-point system conforming to this standard may be realized entirely in software, entirely in hardware, or in any combination of software and hardware. Operations specified in the normative part of this standard may be realized entirely in software, entirely in hardware, or in any combination of software and hardware. Numerical results and exceptions are uniquely determined by the standard.

ON

VPN

- **Virtual Private Network**
 - Enables routing traffic via the university
 - Useful as some sites are only available from inside the university (ULB, ...)
- Two profiles:
 - **campus**: route all traffic through the VPN
 - **extern**: route only university-internal traffic through the VPN
- Setup guide at <https://www.hrz.tu-darmstadt.de/vpn>

Athena Card

- Used for
 - Cashless payment in the canteens and bistros
 - ID for ULB
- Top up
 - With cash or bank card at the machines in the canteen
 - With bank card at the ULB
- Application guide:
<https://www.hrz.tu-darmstadt.de/id/athenekarte>

SSO (Single Sign-on)

- Central login facility for university services

The screenshot shows the login interface for the Identity Provider of the Technical University of Darmstadt. At the top, the university's logo and name are displayed. Below this, the title 'Identity Provider of Technical University of Darmstadt' is centered. The main login area includes a link to 'Login to https://moodle.informatik.tu-darmstadt.de', followed by input fields for 'Username' (containing 'xy42juhu') and 'Password' (masked with dots). There are two checkboxes: 'Don't Remember Login' and 'Clear prior granting of permission for release of your information to this service.' A red 'Login' button is positioned below these options. To the right of the login fields, a list of links in red text provides options for password recovery and help: 'Forgot your password?', 'Activate TU-ID', 'Policies', 'Need Help?', 'IDM-Portal', '2FA-Management', and 'HRZ-News'. A 'Note' section below these links advises users to log out and close their browser when leaving password-protected areas. At the bottom of the page, a copyright notice for 2025 and links to 'Imprint', 'Terms of Use', and 'Privacy Policy' are visible.

next.Hessenbox

- Nextcloud instance with 30 GB of free storage
- Built-in features for sharing with other TUDa members

503
Service
Unavailable

Additional HRZ services

- TUCaN, TU-Moodle, Lichtenberg clusters, ...
 - Microsoft Office 365
 - zoom
 - Computer pools running Windows
 - Rental services
-
- see also <https://www.hrz.tu-darmstadt.de/>

Speaking of TUCaN...

From the

3rd to 7th of November

TUCaN will be under maintenance!

Facilities

at the Computer Science department

C-Pool

- Computer pool in C0-area of Piloty building with 100 computers
 - S2|02 C005 and C003
- Operating System: Linux Mint
- Login using ISP credentials
- 1 GB storage space per student
 - Current usage can be queried using `$ quota -s`
- No food or drinks allowed (except water)

Printers

- Printer and scanner in C-Pool
- To use, enter Athena Card number into ISP account information
- Two main possibilities:
 - a) Print on the machines in the C-Pool and authorize the print using your Athena Card
 - b) Web interface: <https://print.informatik.tu-darmstadt.de/>
- Quota: 50 pages per month
- See also: ISP Wiki → Print via PaperCut

SSH

- Secure Shell (SSH)
- Remote access to machines in our department
- SSH server offered by ISP:
`clientsshX.rbg.informatik.tu-darmstadt.de`
 - where $X \in \{1, 2, 3\}$
- No password authentication, only key authentication

More information

- ISP-Support: account management
<https://support.rbg.informatik.tu-darmstadt.de/>
